

Group 1: Learning Management System

9/18/20

CSCI-P465/565 (Software Engineering I)

Meeting Attendees

Andrew Jedlicka

Kevin Cao

Shaun Trimm

Blake Miller

General Meeting Info

Meeting Purpose: Meet with client and outline project

Start Time: 3:00pm edt

Stop Time: 3:32pm edt

New Business

Discussions Summary: Introductions initially and we gave an outline to customer what we believe they fill. Discussed creative freedom and midpoint demo with Professor Bhutta, end of sprint demos and end of week meetings with Disha. Discussed how to handle team conflicts and individual contributions for each person and why we were selected onto the team. Deadlines are very strict, so make sure to keep them. Discussed the elevator pitch next week and the template that's up for that on canvas. Discussed the requirements document.

Decisions Summary: Five core features that are part of the Learning Management System:

1. Login and Registration
2. Dashboard
3. Search
4. Chat
5. Submissions and Grading

Additional Features

1. Customizable themes?
2. Filtered grading?

New Action Items: Prepare for the presentation as a group and turn in week submissions
